Hi Jerry,

We did not get a chance to talk yet. I'll keep trying.

George

George,

FYI. We probably need your help on this - plan B.... I'll call you on Monday. Have a good weekend.

Jerry

Hi Jerry,

Thank you again for your interest in the ODA code. We generally offer a site license for three years to the executable code for a fee of \$10,000. However, since your organization is affiliated with the state of California, we can offer you the same three year license for \$3,000.

Please let me know if you would like to proceed with the license and I will send you our end user license agreement.

Best,

Virginia

Hi Virginia,

I would like to follow-up on how we can avail of the ODA package needed for data analysis in our Underground Injection Control (UIC) program. I sent you the email below to identify our needs. We would appreciate your feedback and please let me know if you need any more information. Thank you very much.

Best regards,

***Jerry Salera***

Hi Virginia,

Thank you very much for your reply.

I've just checked with our IT folks and they say we will just need the executable. Our system runs on Windows XP 32-bit but in a year or 2 , we will migrate to Windows 7.

We have at this time, 3 locations where have an urgent need for this software: 1) Cypress (LA) district office; 2) Bakersfield (Kern County) district office; 3) HQ here in Sacramento. The first 2 locations are our 2 busiest districts where California's major oil fields are located. We have 4 other districts where we may need to run this package as well, but we can probably do that here in our HQ initially.

Please let me know if you need anymore information. Thank you very much.

Best regards,

***Jerry Salera***

Jerry,

Thank you for your email. Will you be needed source code or executable code and do you plan on using the code at more than one location?

Best,

Virginia

Hi Virginia,

I just called you regarding the possible use of the ODA package for some work that we do in our Underground Injection Control (UIC) Program. We are a state agency under the California Department of Conservation tasked among other things, with the regulation of EPA Class II and EPA Class V (Geothermal) injection in the state as part of the state MOA with EPA Region 9. With this Memorandum of Agreement with the EPA, we have been given “primacy” in the permitting and regulation of Class II and Class V (Geothermal) wells in the state. We maintain close coordination with the EPA so that the mandates of the federal Safe Drinking Water Act (SDWA) are met under our UIC program.

Please check our website at <http://www.conservation.ca.gov/dog/Pages/index.aspx> and if you have any questions, please call email or call me below. Thank you very much.
